WORK EXPERIENCE

.NET Developer, *MCIT – Ministry of Communications and Information Technology* 04/2025 – Present

- Developed and maintained enterprise-level web applications using ASP.NET MVC 5 and ASP.NET Web API, following clean architecture principles.
- Designed, built, and consumed RESTful APIs to enable secure communication between internal systems and external services.
- Contributed to the development of microservices solutions, implementing services communication using HTTP/REST and message queues (RabbitMQ).
- Wrote efficient SQL Server queries, created stored procedures, views, and functions to support complex business requirements and optimize database performance.
- Contributed to the development of APIs focusing on building secure, scalable services for citizen e-services integration.

Fullstack .NET || Angular, *Oasis Computer Systems* 10/2024 – 03/2025

- Developed and maintained web APIs using .NET Core, with a focus on clean code and best practices.
- Assisted in configuring and consuming APIs, integrating with frontend applications
- Provided maintenance and troubleshooting for existing .NET applications.
- Utilized SQL Server for data storage, writing queries, and optimizing database performance.

.Net Developer, *Iskan Insurance Company* 07/2023 – 09/2024

- Developing applications using ASP.NET Core – web application to register Rejected people that not provided in Company system and now it production.
- Maintain application like Report manager system.
- Write and modify queries to departments that need reports not provided in the system.
- Working on Financial Regulatory Authority (FRA) Api Integration to make automated connection between Company's system and Fra Portal, design database and build web application using .net core in consideration write clean and secure code.
- Using design patterns and solid principles.

EDUCATION

Bachelor of computer science, *Helwan university* 2021 – 2021
Cairo, Eg

TECHNICAL SKILLS

Programmng Concepts

OOP, Data Structure, Git,Azure, Design Patterns, Solid Principles

DataBase

Sql Server, EntityFrameWork Core, Dapper, Linq

Web Frontend Technologies

HTML, CSS, Sass, Bootstrap, JavaScript, JQuery, Ajax
TypeScript, Angular , Basics React, Basics Next

Programming Languages

C#, php, Python

Backend Development

ASP.NET Core MVC, ASP.NET CORE Web API.

COURSES

WebDesign, ITI menofia

06/2023 – 07/2023

FullStack .NET | Angular, Route

PROJECTS

Stock Exchange, 3-tier api project that displays Stocks for users, user can make order and see displayed orders at first user should create account then login to get into dashboard user can update price real time using SignalR.

used technologies :

Linq, Entity FrameWork, .NET Core Api JWT, SignalR.

Shopping Application, 3-tier Api Application that displays Products with authorization User And Admin, Admin-User can add Product Admin Can Add Promocode And Exchange Rate that stored in Redis Server User Can Make Order

Technologies Used:

.NET Core Api, EF Core, LINQ, SQL server, Redis

E-Commerce (Angular), Link Demo : <https://e-commerce-self-alpha-79.vercel.app/login> short demo of our e-commerce website which has a lot of features that used in Angular handling shopping cart and payments. The project is still under development.

technologies:

- Authentication, Adding/Removing products to and from cart
- Adding/Removing products to and from Wishlist, Forgot password and the ability to change password from settings in profile, the same could be said about the user's info could also be updated from settings in profile., Ability to search through products

The features that I used in Angular to create this project are:

- Components, Lazy loading, Routing, pipe (search, currency)
- interceptors (to add token as a header for API), Built-in directives (ngFor,ngIf)
- Data Binding, Two-way Data Binding, Property Binding, Event Binding, Interface, Service, Guard
